SEC. 16 (S $\frac{1}{2}$) T. 1N R. 8W SLBM

REPRESENTATIVE: Mr. L. K. Bradley

DATE OF APPROVAL: April 27, 1981

(1) Section 40-8-15 and Rule M-8 of the Utah Mined Land Reclamation Act,
require each operator to include with this report and up-dated map and
plan prepared in accordance with Rule M-3, providing a detailed status of
all mining and reclamation activities which have occurred during the past
year.

(2) The gross amount of materials moved during the year for this mining
operation was: 1590.85 Tons

The disposition of each type of material was: All material was transported
to Ideal Basic Industries, Inc., Devil's Slide cement plant as raw material
in the manufacture of portland cement.

* The listed operator completed its contract with Ideal Basic Industries, Inc.,
by production of the listed quantity of material from a stockpile created
in 1982. Thus, there is no actual change in the quarry from the 1982 annual
report. However, better mapping has resulted in an increase in disturbed

in this report. The bonding is being increased to reflect this change and
to provide additional space for an expansion of the quarry operation when it
is resumed. See Bond Note.
